Pacific Coast Archaeological Society Quarterly

The *Pacific Coast Archaeological Society Quarterly* is a publication of the Pacific Coast Archaeological Society (PCAS), which was organized in 1961. PCAS is an avocational group originally founded to study and to preserve the anthropological and archaeological history of the original inhabitants of Orange County, California, and adjacent areas. The Publications Committee invites the submittal of original contributions dealing with regional history and prehistory. Although PCAS is especially interested in reports which shed further light on the early inhabitants of coastal southern California, it is always interested in reports on the wider Pacific Coast region.

Information about subscriptions to the *Pacific Coast Archaeological Society Quarterly* and the *PCAS Newsletter* is available online at www.pcas.org. Back issues of the *Pacific Coast Archaeological Society Quarterly* are available. An index to Volumes 1 through 40 is available as Volume 40, Numbers 3 & 4. This searchable index is online at www.pcas.org. Three *Occasional Papers*, on Catalina Island, Mexican Majolica, and the Peralta Adobe, have also been published by PCAS. To place an order, receive information about the Pacific Coast Archaeological Society, or submit an article for publication, email publications@pcas.org or write: Pacific Coast Archaeological Society, P.O. Box 10926, Costa Mesa, California, 92627. Additional information is available at www.pcas.org. PCAS is not responsible for delivery of publications to subscribers who have not furnished a timely change of address.

Recent issues of the *Pacific Coast Archaeological Society Quarterly* are available at www.pcas.org and can be downloaded and viewed, but not printed. Articles appearing in the *Pacific Coast Archaeological Society Quarterly* are abstracted in *Historical Abstracts* and *America: History and Life*. This issue of the *Pacific Coast Archaeological Society Quarterly* is copyrighted © 2010 by the Pacific Coast Archaeological Society. ISSN 0552-7252.

PCAS Officers 2007

President	Megan Galway
Vice President	Sandy Schneeberger
Secretary	Dorothy DeGennaro
Treasurer	Robert Brace

Please note that this issue was published in June 2010. In the PCAS Quarterly publication sequence, this issue is Volume 43, Number 3 (subscription year 2007).

Contents

An AMS Radiocarbon Date for a Steatite Hook/Bird Effigy from CA-ORA-340 1
Henry C. Koerper and Roger D. Mason

Archaeological Investigations at CA-KER-229,
Tomo-Kahni State Historic Park, Sand Canyon, California 19
Mark Q. Sutton, Mark W. Allen, Gregory R. Burns, and Blendon Walker

Prehistoric Employments of Pearls in Coastal Southern California with
Special Attention to Specimens Recovered at Bolsa Chica Mesa, Orange County 65
Henry C. Koerper and Nancy Anastasia Desautels-Wiley

Cover: Hook/bird effigy from CA-ORA-340. Drawing by Joe Cramer.

About the Authors

Mark Allen, Ph.D., earned his BA in anthropology from the University of Illinois in 1984, and completed an MA in 1986 and a Ph.D. in 1994 at UCLA. He has taught at UCLA and Pomona College and is currently an Associate Professor at California State Polytechnic University, Pomona. He has also worked at several environmental firms as an archaeologist. His research interests include the Mojave Desert, the Pacific Islands, cultural ecology, political economy, warfare, and hunter-gatherers.

Gregory R. Burns is a graduate student at the University of California, Davis, and backcountry archaeologist for Yosemite National Park. He has worked in the Great Basin and Southwest since completing undergraduate studies at California State Polytechnic University, Pomona, in 2008. His research interests include trade, cultural diffusion, and conflict in the Mojave Desert and surrounding areas

Nancy Anastasia Desautels-Wiley, Ph.D., began her career studying classical languages; Dr. Desautels-Wiley subsequently broadened her scholarly pursuits to include research focused on both prehistoric and historic archaeology; she was certified in both subdisciplines by the Society of Professional Archaeologists. Experience in New York State prehistory and a strong classical background in history and architecture have served her well as research director and principal investigator for the oldest cultural resource management firm, Scientific Resource Surveys, Inc. (SRS) (est. 1973). Dr. Desautels-Wiley has managed the longest privately funded cultural resource investigations in southern California (29 years). These investigations comprise a multi-site and multi-disciplinary project that integrates archaeological, historic, ethnographic and paleontological studies. Within the last three years, she has expanded her expertise in Native American cultural studies and has recently accepted a position as tribal archaeologist for the Chilkat Tlingit Tribal group in Haines, Alaska. She is married to a Tlingit/Southern Tutchone Native, Ted Wiley, and they have opened a branch office of SRS in Haines in order to train Native American monitors. The company is researching the Tlingit language using the Alaskan field notes of J. P. Harrington; the goal is to generate a comparative Tlingit dictionary.

Henry Koerper, Ph.D., is retired from Cypress Community College but keeps active as a consultant to Statistical Research, Inc., Redlands Office, and as a consultant to Scientific Resource Surveys, Inc., Orange County Corporate Office. His interests outside of California prehistory include American Indians in modern sports, the ancient and modern Olympic Games, the California Gold Rush, the 1906 San Francisco earthquake and fire, ancient Greek numismatic art, and the history of science.

Roger D. Mason, Ph.D., RPA, has been a principal investigator and project manager for cultural resource management projects in southern California since 1983. Dr. Mason is currently Director of Cultural Resources at ECORP Consulting, Inc. Prior to coming to California, he carried out archaeological research in Mesoamerica and Missouri and was educated at the University of Texas. Mason specializes in the prehistoric archaeology of the southern California coast. He was Principal Investigator for the Newport Coast and San Joaquin Hills Transportation Corridor archaeological data recovery projects in the San Joaquin Hills area of coastal Orange County. Dr. Mason is the author of several published articles that summarize the prehistory of coastal Orange County.

Mark Q. Sutton, Ph.D., began his career in anthropology in 1968. While still in high school, he took advantage of the opportunity to participate in archaeological excavations conducted by the local community college. He went on to earn a BA (1972), an MA (1977), and a Ph.D. (1987) in anthropology. He has worked as an archaeologist for the US Air Force, the US Bureau of Land Management, and various private consulting firms, and he has taught at a number of community colleges and universities. He taught at California State University, Bakersfield, from 1987 to 2007 where he retired as Emeritus Professor of Anthropology. He now works for Statistical Research, Inc. in San Diego. Dr. Sutton works on understanding hunter-gatherer adaptations to arid environments but has also investigated entomophagy, prehistoric diet and technology, and optimal foraging theory. Dr. Sutton has worked at more than 120 sites in western North America and has published over 160 books, monographs, and papers on archaeology and anthropology.

Blendon Walker received his BA in anthropology from CSU Bakersfield and entered the master's program at CSUB. He has worked in the southern San Joaquin Valley, the southern Sierra Nevada, and the Mojave Desert and has presented results from his work at the annual meetings of the Society for California Archaeology. His work at CA-KER-229 was associated with a possible MA thesis topic. Mr. Walker now works outside of archaeology in private industry in Tehachapi, California.
