Pacific Coast Archaeological Society Quarterly

The *Pacific Coast Archaeological Society Quarterly* is a publication of the Pacific Coast Archaeological Society (PCAS), which was organized in 1961. PCAS is an avocational group formed to study and to preserve the anthropological and archaeological history of the original inhabitants of Orange County, California, and adjacent areas.

The Publications Committee invites the submittal of original contributions dealing with the history and prehistory of the area. Although PCAS is especially interested in reports which shed further light on the early inhabitants of Orange County, it is always interested in reports on the wider Pacific Coast region.

Subscription to the *Pacific Coast Archaeological Society Quarterly* costs \$35 for calendar year 2007. The PCAS also publishes a monthly newsletter, which costs \$15 for calendar year 2007. There is an additional postage charge for foreign subscriptions: \$9 for the *Pacific Coast Archaeological Society Quarterly* and \$4 for the *PCAS Newsletter*. Back issues of the *Pacific Coast Archaeological Society Quarterly* are available for \$12 per single issue (including postage and handling for domestic address). A complete list of the articles in previous issues is included in the 25-year index published as Volume 25, Number 4, (1989) and the 5-year supplement published as Volume 32 Supplement (1996). Three *Occasional Papers*, on Catalina Island, Mexican Majolica, and the Peralta Adobe, also have been published by PCAS. To place an order, or to receive information about the Pacific Coast Archaeological Society, or to submit an article for publication, write to: Pacific Coast Archaeological Society, P.O. Box 10926, Costa Mesa, California, 92627, email: info@pcas.org. PCAS is not responsible for delivery of publications to subscribers who have not furnished a timely change of address. Articles appearing in the *Pacific Coast Archaeological Society Quarterly* are abstracted in *Historical Abstracts* and *America: History and Life*.

Recent issues of the *Pacific Coast Archaeological Society Quarterly* appear on the Internet at www.pcas.org where they can be downloaded and viewed, but not printed. This issue of the *Pacific Coast Archaeological Society Quarterly* is copyrighted © 2007 by the Pacific Coast Archaeological Society. ISSN 0552-7252.

PCAS Officers 2003

President	Sandy Schneeberger
Vice President	Paul Chace
Secretary	Steve O'Neil
Treasurer	Rene Brace

Please note that this issue was printed and distributed in February 2007. The cover illustration of an argillite bead from CA-ORA-649 was drawn by Jack Lissack.

Contents

Red Beads in Southern California..... 1
Carol R. Demcak

Rethinking the Chronology of Ray Cave
(CA-INY-444) in the Coso Range, California 25
Alexander K. Rogers

A Fragmentary Fluted Point from
Silurian Valley, San Bernardino County, California 45
Michael F. Rondeau and Thomas T. Taylor

Prehistoric Dolomite and Obsidian Disc Beads:
New California Artifact Types from Orange County 53
Henry C. Koerper, Joanne H. Couch,
Jeffrey S. Couch, and Nancy Anastasia Desautels

We are pleased to offer color illustrations for the first time in the *PCAS Quarterly*. We thank Carol Demcak, Archaeological Resource Management Corporation, for making a donation to cover the extra costs involved.

About the Authors

Jeffrey S. Couch is an archaeologist with Scientific Resource Surveys, Inc., Temecula, California. He earned his B.A. in Anthropology at the University of California, Riverside, and he is working on his M.A. degree at California State University at Long Beach. His speciality is lithics analysis, and he presently is involved in the Bolsa Chica Archaeology Project.

Joanne S. Couch is an archaeologist with Scientific Resource Surveys, Inc., Temecula, California. Her research interests include geology, lithic sourcing, and lithics analysis. Currently, she is involved in the Bolsa Chica Archaeology Project.

Carol R. Demcak received her M.A. in Anthropology (emphasis archaeology) from California State University, Long Beach, in 1981. Her research interests include lithic procurement and exchange in southern California. She is currently President of Archaeological Resource Management Corporation (ARMC).

Nancy Anastasia Desautels is president and research director of the cultural resource management firm, Scientific Resource Surveys, Inc., Temecula, California. She has extensive archaeological experience in the United States and Europe and has been a member of the Franchthi Cave research team in southern Greece since 1973. In southern California, Dr. Desautels has a wide range of interests in both historic and prehistoric archaeology.

Henry Koerper earned his B.A. and M.A. degrees from the University of California Davis (1965 and 1968). In 1981, he finished his Ph.D. studies at University of California Riverside. Dr. Koerper retired from full-time teaching at Cypress College in Orange County in May, 2005. He plans to continue doing archaeological research and writing on a variety of subjects.

Alexander (Sandy) Rogers is Archaeology Curator for the Maturango Museum in Ridgecrest, California. A retired physicist, he received his M.A. in Anthropology in 2004 from California State University, Bakersfield. His research interests focus on hunter-gatherers of the Mojave Desert and Great Basin, and on improving techniques for obsidian hydration dating. He and his wife Fran are both archaeological site stewards, and live in Ridgecrest.

Michael Rondeau has an M.A. in Anthropology from California State University, Sacramento. He is currently the Principal Investigator of Rondeau Archeological, specializing in various forms of lithic analysis. Research interests include the development of new applications for lithic analysis, peopling of the new world, and artifact typology as it relates to defining prehistoric behavior and geoarchaeology. He is the principal researcher for the CalFLUTED (California Fluted Lanceolate Uniform Testing and Evaluation

Database) project that is seeking to elucidate the nature and variability of fluted points in the Far West. The current article is one outgrowth of that research.

Thomas T. Taylor is the senior archaeologist and manager of the biological and archaeological resources group for Southern California Edison's Corporate Environment, Health & Safety Division. Tom received his B.A. and M.A. degrees in Anthropology from California State University, Fullerton. He has been involved in archaeological and historical research in the Southern and Central California regions since the mid 1970s. His research interests have included prehistoric cultural responses to environmental change, the historic development of hydroelectric technology, and vernacular architectural history in Southern California.
