Pacific Coast Archaeological Society Quarterly

The *Pacific Coast Archaeological Society Quarterly* is a publication of the Pacific Coast Archaeological Society (PCAS), which was organized in 1961. PCAS is an avocational group originally founded to study and to preserve the anthropological and archaeological history of the original inhabitants of Orange County, California, and adjacent areas. The Publications Committee invites the submittal of original contributions dealing with regional history and prehistory. Although PCAS is especially interested in reports which shed further light on the early inhabitants of coastal southern California, it is always interested in reports on the wider Pacific Coast region.

Information about subscriptions to the *Pacific Coast Archaeological Society Quarterly* and the *PCAS Newsletter* is available online at www.pcas.org. Back issues of the *Pacific Coast Archaeological Society Quarterly* are available. An index to Volumes 1 through 40 is available as Volume 40, Numbers 3 & 4. This searchable index is online at www.pcas.org. Three *Occasional Papers*, on Catalina Island, Mexican Majolica, and the Peralta Adobe, have also been published by PCAS. To place an order, receive information about the Pacific Coast Archaeological Society, or submit an article for publication, email publications@pcas.org or write: Pacific Coast Archaeological Society, P.O. Box 10926, Costa Mesa, California, 92627. Additional information is available at www.pcas.org. PCAS is not responsible for delivery of publications to subscribers who have not furnished a timely change of address.

Recent issues of the *Pacific Coast Archaeological Society Quarterly* are available at www.pcas.org and can be downloaded and viewed, but not printed. Articles appearing in the *Pacific Coast Archaeological Society Quarterly* are abstracted in *Historical Abstracts* and *America: History and Life*. This issue of the *Pacific Coast Archaeological Society Quarterly* is copyrighted © 2012 by the Pacific Coast Archaeological Society. ISSN 0552-7252.

PCAS Officers 2010

President	Scott Findlay
Vice President	Stephen O'Neil
Secretary	Megan Galway
Treasurer	Rene Brace

Please note that this issue was published in April 2012. In the PCAS Quarterly publication sequence, this issue is Volume 46, Numbers 1 and 2 (subscription year 2010).

A Proposed New Genre for the Portable Cosmos of
South Central Coastal California: The Dorsal Fin Effigy 39
Henry C. Koerper and Nancy Anastasia Desautels-Wiley

Cover: Fin-like effigies. Left to right, CA-ORA-83, CA-ORA-58, and CA-ORA-190.
Drawings by Joe Cramer.

About the Authors

Nancy Anastasia Desautels-Wiley, Ph.D., began her career studying classical languages. She subsequently broadened her scholarly pursuits to include research focused on both prehistoric and historic archaeology, and she was certified in both subdisciplines by the Society of Professional Archaeologists. Experience in New York State prehistory and a strong classical background in history and architecture have served her well as research director and principal investigator for the oldest cultural resource management firm, Scientific Resource Surveys, Inc. (SRS) (est. 1973). Dr. Desautels-Wiley has managed the longest privately funded cultural resource investigations in southern California (29 years). These investigations comprise a multi-site and multi-disciplinary project that integrates archaeological, historic, ethnographic and paleontological studies. Within the last three years, she has expanded her expertise in Native American cultural studies and has recently accepted a position as tribal archaeologist for the Chilkat Tlingit Tribal group in Haines, Alaska. She is married to a Tlingit/Southern Tutchone Native, Ted Wiley, and they have opened a branch office of SRS in Haines in order to train Native American monitors. The company is researching the Tlingit language using the Alaskan field notes of J. P. Harrington; the goal is to generate a comparative Tlingit dictionary.

Jill K. Gardner, Ph.D., received her doctorate in anthropology from the University of Nevada, Las Vegas. She is currently the owner and president of Jill K. Gardner & Associates, Inc., Archaeological Consultants, based in downtown San Diego. Dr. Gardner's main research areas are the Mojave Desert, the Great Basin, the southern Sierra Nevada, the San Joaquin Valley, the southern California coast, and inland southern California. She has also conducted excavations and analyses of Late Roman/Coptic mummies in Egypt and participated in excavations at a Neolithic site in southern Jordan. Dr. Gardner has published articles in the *Journal of California and Great Basin Anthropology*, *Quaternary Science Reviews*, *British Archaeological Reports*, *Pacific Coast Archaeological Society Quarterly*, *Coyote Press Archives of Great Basin Prehistory*, *Proceedings of the Society for California Archaeology*, and *Nevada State Museum Anthropological Papers*, and she has co-authored books through the University of Arizona Press and AltaMira Press.

Kenneth W. Gobalet, Ph.D., has recently retired from over 30 years of university-level teaching. For the last 25 years he was a Professor of Biology at California State University, Bakersfield, teaching courses including introductory zoology, evolution, comparative anatomy and human biology. Prior to working at California State University, Bakersfield, he was on the faculty at Loyola University, New Orleans, and the University of Montana, Missoula. His graduate and undergraduate coursework was taken at the University of California, Davis. Between his undergraduate and graduated studies, he was an American Peace Corps Volunteer in central India, working to enhance the production of a fish farm. For 35 years his primary research agenda has been the identification and interpretation of ancient fish remains recovered during the excavation of archaeological sites primarily within California. To complete this work, he amassed a fish skeletal collection numbering in the hundreds of specimens. He has not retired from the zooarchaeological work and prides himself on having commuted by bicycle to work for his entire career.

Henry Koerper, Ph.D., received a BA (1965) and an MA (1968) from UC Davis, and he earned a Ph.D. in anthropology at UC Riverside in 1981. His varied employments have included: CDF firefighter; USFS fire suppression field and laboratory researcher; California Army National Guard explosives technician; archaeological field excavator (e.g., Old Sacramento Project, Prescott College Black Mesa Project); Peace Corps teacher and athletic coach (Voi Harambee High School, Kenya); college anthropology professor (Chapman College [5 years] and Cypress Community College [30 years]); and archaeological consultant to several southern California CRM firms. Semi-retirement allows Dr. Koerper time to help produce the *PCAS Quarterly*.

Mark Q. Sutton, Ph.D., began his career in anthropology in 1968. While still in high school, he took advantage of the opportunity to participate in archaeological excavations conducted by the local community college. He went on to earn a BA (1972), an MA (1977), and a Ph.D. (1987) in anthropology. He has worked as an archaeologist for the US Air Force, the US Bureau of Land Management, and various private consulting firms, and he has taught at a number of community colleges and universities. He taught at California State University, Bakersfield, from 1987 to 2007, where he retired as emeritus professor of anthropology. He now works for Statistical Research, Inc. in San Diego. From 1986 to 2000 Dr. Sutton served as the editor of the *Journal of California and Great Basin Anthropology*. Dr. Sutton has investigated hunter-gatherer adaptations to arid environments, entomophagy, prehistoric diet and technology, optimal foraging theory, and regional culture histories. Dr. Sutton has worked at more than 120 sites in western North America, has presented more than 120 papers at professional meetings, and has authored more than 170 books, monographs, and papers on archaeology and anthropology, including several articles in recent issues of the *Pacific Coast Archaeological Society Quarterly*.
